ST. JOHN BOSCO CLINIC

A MESSAGE FROM RHEINCHARD R. REYES, MD, CLINIC MEDICAL DIRECTOR

Patients come to the St. John Bosco Clinic with more than illness – they come with barriers, uncertainty, and often nowhere else to go. As a free clinic, we provide compassionate, high-quality care regardless of the ability to pay to all patients who meet the registration criteria. This report reflects lives stabilized and futures restored – made possible by you.

34 YEARS OF IMPACT

St. John Bosco Clinic, which opened its doors on July 1, 1992, has continuously maintained its service to the Miami-Dade community. The Clinic opened as a response to the growing number of underserved and uninsured individuals who lacked access to basic primary healthcare. Today, we continue this vital work with our volunteer physicians and program staff. We are grateful for the support and generosity of our community partners, philanthropic individuals, corporations and foundations.

ANNUAL IMPACT SNAPSHOT

974

Unduplicated patients

3,788

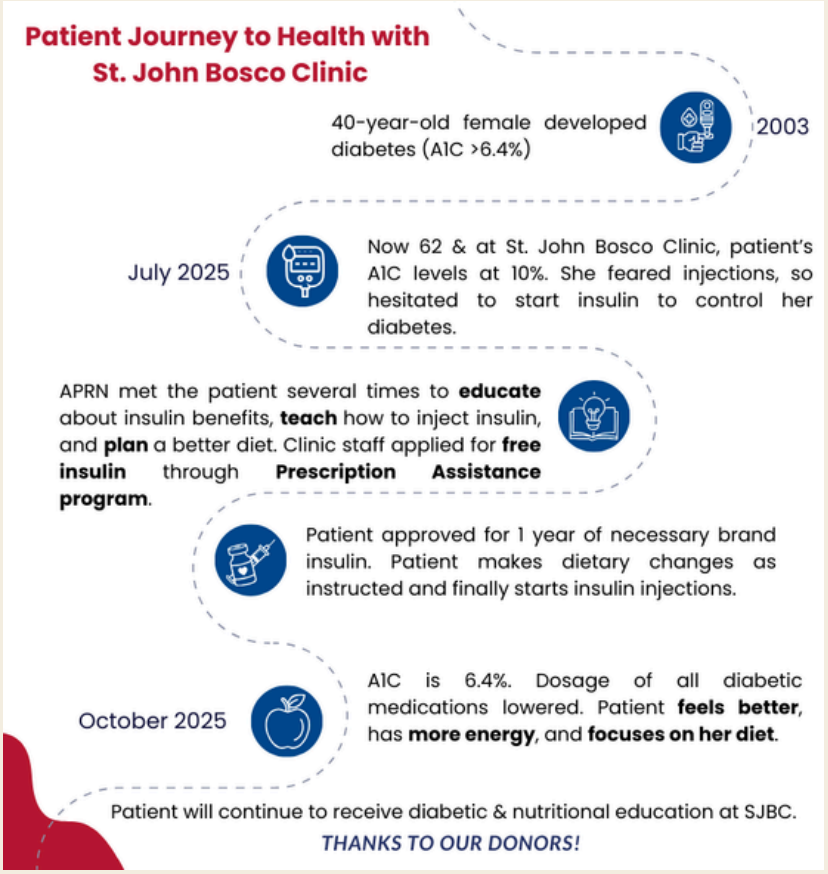

Clinic visits
(primary & specialty care)

1,005

Cancer screenings
(breast, cervical, colorectal)

ST. JOHN BOSCO CLINIC'S IMPACT

Providing a medical home for the uninsured helps families for *generations.*

Services Provided By Volunteer Partners

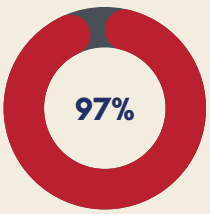

- 1,747 pro-bono labs / diagnostics
- 468 breast cancer screenings
- 194 cervical cancer screenings
- 343 colorectal cancer screenings
- $265,137 medication assistance
- 219 community volunteer physician appointments
- 121 community referrals

Community Outreach

- Over 440 individuals reached
- University of Florida Nutrition Programs
- Empowerment Sessions
- Matthew 25 Food Pantry
- CDC Church
- Colombian Consulate Services Fair
- YMCA La Bodega Food Pantry

Volunteer Hours

- 660 Licensed Healthcare Provider Hours
- 1,285 Support Staff Hours
- 360 UM DOCS Physician Hours

Programmatic Efficiency

$0.97 of every dollar donated goes directly to an organization's programs and services rather than administrative or fundraising costs

EMERGENCY ROOM (ER) DIVERSION: INVESTING IN FREE CLINICS TODAY A NECESSARY CAUSE

The St. John Bosco Clinic participates in the ER Data Diversion Project managed by the Florida Association of Free & Charitable Clinics (FAFCC). This initiative is a critical step in demonstrating the impact St. John Bosco Clinic and other FAFCC members have on reducing unnecessary emergency room visits, improving patient care and reducing healthcare costs across Florida.

Why This Project Matters to Miami-Dade County

Free and charitable clinics provide accessible healthcare to underserved communities and uninsured residents who might otherwise rely on costly emergency room care. By collecting and analyzing statewide data through this project, St. John Bosco Clinic helps to:

Quantify the Impact: Show how services prevent unnecessary ER visits and improve overall community health

Support Advocacy Efforts: Use data-driven insights to influence policy changes and secure vital funding

Enhance Patient Care: Identify common reasons for ER visits and develop targeted interventions to better serve patients

Key Findings from Year One

Based on responses from 4,239 patients across FAFCC member clinics:

- **36%** reported **fewer hospital stays**
- Over **52%** had **no prior access to healthcare**
- **15.5% relied primarily on the ER** before finding the clinic
- Nearly **24%** reported **fewer missed days** of work or school

Change in ER Use After Starting at the Clinic

Estimated Cost Savings

$10.96 million

Patients who reported reduced ER use in the 2024-25 data collection represent a total of **$10.96 million*** in estimated cost savings statewide.

$672.9 million

Extrapolating this trend across all 242,573 patients served by FAFCC clinics in 2023–24 yields an estimated **$672.9 million** in potential healthcare cost savings.

Learn more here: https://www.fafcc.org/er-diversion-data

*Average ER visit cost derived from Florida Health Finder data. Charges reflect facility fees only; not adjusted for case severity or actual payments. **Average for self-pay ER patients = $6,652 per visit**

We couldn't have done it without your generous *support.*

HOW FAR WILL YOUR DONATION GO?

$500 covers the costs of healthcare services for 1 person for 1 year

$250 pays for medication for our dispensary

$100 purchases exam room supplies and equipment

$50 pays for a cervical cancer screening for 1 woman

$25 covers testing strips for 3 months for a patient with diabetes

Every dollar raised is amplified by $3 in in-kind contributions, maximizing the resources available to serve our patients. We triple your investment.

Thank you

to all our partners, donors and volunteers.

Give Today.

St. John Bosco Clinic & SSJ Health Foundation appreciate those who support our mission to serve the basic primary medical needs of the uninsured and underserved children & adults in Miami-Dade County.

Funds raised by SSJ Health Foundation support operations, salaries, and patient care at the St. John Bosco Clinic. Contributions may be directed to either organization in support of this shared mission.
